

## Floating Oil Only Booms

***Contain and absorb oil spills on water with SpillTech® Floating Oil Booms.***

- 🔹 SpillTech® Floating Oil Booms are designed for use on water to contain and absorb oil and fuel spills in streams, rivers, marinas, and harbours.
- 🔹 Each 3m boom can be connected to the next with a 150mm overlap to form a continuous boom that not only acts as a barrier to stop spills spreading, but also begins to absorb the spill when it comes in contact with oils and fuels.
- 🔹 Rope along the length of the boom takes the strain of movement so the absorbent material inside stays intact and avoids holes or bunching that is commonly found with inferior booms.

### **Product Variations:**

- 🔹 Large Floating Oil Boom:
  - Code: ASOB20
  - Dimensions: 20cm (dia) x 3m, 3.8kg
  - Absorbency: 90L
  - Bag Qty: 4
- 🔹 Medium Floating Oil Boom:
  - Code: ASOB12.7
  - Dimensions: 12.7cm (dia) x 3m, 2.4kg
  - Absorbency: 50L
  - Bag Qty: 4
