

Back Panel

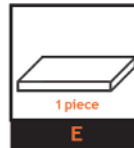

Base

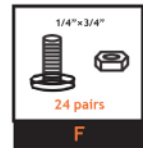

Door

Side Panel

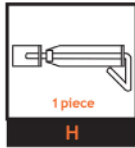

Top Panel

Bolt & Nut

Washer

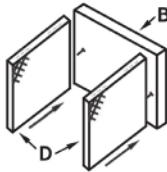

Latch Bolt

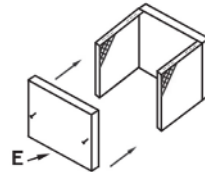

Anchor Bracket

1.

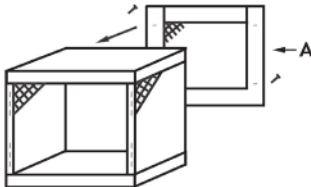

In an open assembly area free of obstructions, place the base (B) upright as shown. Assemble each side panel (D) by hand-tightening the bolts, washers, & nuts provided (F & G). Ensure the mesh of the side panels face outward.

2.

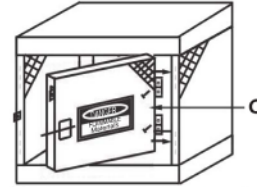

Assemble the top panel (E) to the side panels (D). Hand-tighten the bolts, washers, & nuts provided (F & G). Ensure the unit is square & firmly tighten the bolts connecting the side panels to the base. Tighten the bolts connecting the side panels to the top panel. Set unit upright.

3.

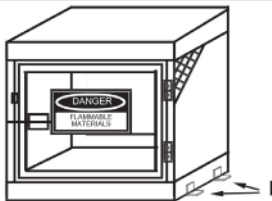

Connect the back panel (A) to the side panels (D) using the bolts, washers, & nuts provided (F & G). Ensure the unit remains square & firmly tighten the nuts.

4.

Attach the door (C) to the assembly using the bolts, washers, & nuts provided (F & G). Hand-tighten the nuts, adjust the door's position such that an even gap is maintained on all sides. Then firmly tighten nuts. Attach the latch bolt eyelet (H) to the side panel.

5.

Using the bolts, washers, & nuts provided (G & H) connect the anchor bracket (I) to the side of the base (B) to fix the cage onto a desk for optional use.
