

Minimise and reduce sediment, rubbish and hydrocarbons entering the stormwater system

- Stormwater pollution is a major concerns for local and regional councils and negatively impact the environment.
- Ultra DrainGuards simply install into your existing cesspit and effectively remove contaminants as stormwater passes through.
- ***Proven to exceed 80% sediment removal.***
- Holds up to 18kg of sediment and rubbish.
- The DrainGuard Plus absorbs up to 5L of hydrocarbons such as oil, petrol & diesel.
- Overflow ports and the accumulation pocket minimises the risk of flooding or ponding, even in very heavy downpours.
- Also available in a "Curb-Style" model for stormwater cesspits with curb cut-outs.

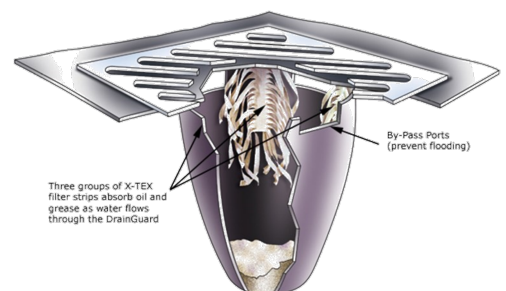

The Ultra DrainGuard is essential for when undertaking roading activities where sediment is an issue.

They are also ideal for businesses with car parks or hardstand areas that are susceptible to run-off containing contaminants such as oil, diesel, dirt, grits, rubbish, paint chips etc.
