

Chemical Absorbent Socks

Contain and absorb chemical spills with SpillTech® Chemical Absorbent Socks. Tough enough for the nasty stuff!

- SpillTech® Chemical Absorbent Socks are constructed from polypropylene that quickly and effectively absorbs a wide range of liquid chemicals including acids and alkalis.
- Available in 1.2m and 3m lengths, SpillTech® Chemical Socks are an essential part of any spill kit or spill response trailer.
- Absorbent socks are typically used to stop spills from spreading and allow spilled liquids to pool behind the socks making clean up quicker and easier.
- Socks can be over lapped to make an effective barrier and provide responders with time to clean up the remaining spill.
- SpillTech® Chemical Absorbent Socks absorb all liquid chemicals and are designed for use on land only.
