A high capacity spill pallet for safe drum storage. The 4 Drum Spill Pallet is designed to securely hold four 200-220 litre drums while capturing leaks, drips, and accidental spills before they reach the floor or stormwater system.

Manufactured from durable, chemical resistant LLDPE, it provides reliable protection when storing hazardous substances such as fuels, oils, solvents, chemicals, and other dangerous liquids.

Featuring a removable grating platform for easy cleaning and sump access, this spill pallet supports compliance and helps businesses meet their hazardous substance storage obligations.

Ideal for warehouses, workshops, manufacturing sites, and agricultural facilities, it is a practical solution for improving site safety and reducing environmental risk.

KEY FEATURES

- LLDPE construction has a wide range of chemical compatibility.
- Applications include hazardous waste collection and storage of chemicals in drums.
- Drum footprint in grating stops drums from sliding.
