

SPILLTECH ABSORBENT ROLL RACK

PRODUCT CODE: **ASRACK**

DESCRIPTION

The SpillTech Absorbent Roll Rack is a freestanding dispenser stand built to hold large absorbent rolls securely off the ground, letting staff tear off exactly the length needed without unwinding half the roll in the process.

Featuring a stable cross frame base and a central spindle, it keeps SpillTech absorbent rolls tidy, accessible, and ready to deploy across any site that stores or handles liquids and hazardous substances.

SPECIFICATIONS

Colour: Black

Material: Steel Tube

Surface: Powder Coated

Overall Width: 1m

Overall Height: 88cm

Open Angle/Expanded Size:
38cm

Net Weight: 3kg

Gross Weight: 3.3kg

Package Size: 1.02m x 1.02m x
6cm

Compatible Material: Various
roll materials of suitable sizes

The SpillTech Absorbent Roll Rack can hold a full size SpillTech absorbent roll on a horizontal spindle, supported by a wide cross frame base for stability on concrete, workshop, and warehouse floors.

This freestanding rack gives sites a reliable, repeatable way to easily access and rip spill absorbents pads from the roll, supporting faster response times.

KEY FEATURES

- Steel frame holds a full size absorbent roll on a central spindle for smooth, controlled unrolling.
- Wide cross frame base provides stability on concrete, workshop, and warehouse floors.
- Staff can pull the roll to the required length and tear off along the roll's built in perforations, cutting down on wastage.
- Freestanding design means it can be positioned in high risk areas without being bolted to a wall or bench.
- Built for daily industrial use while remaining light enough to reposition as site layout changes.
